Cover Letter: Desktop Support Analyst

Western Pacific Building Materials Inc Vancouver, WA July 18, 2026

Dear Hiring Manager,

I am writing to express my strong interest in the Desktop Support Analyst position at Western Pacific Building Materials Inc. With ten years of hands-on experience in enterprise IT administration, end-user support, and infrastructure troubleshooting, I am confident I can bring immediate technical stability and high-quality service to your frontline support team.

Throughout my career I've specialized in endpoint deployment, identity management, and multi-site IT support. In my current role at Daimler Truck LLC, I provide hands-on support for both remote and office end-users while keeping device logistics running smoothly. My background in systems administration means I can dig into complex hardware and access control problems and resolve them on the spot — without waiting for an escalation.

- **Endpoint Deployment & Diagnostics**, I've deployed and configured hundreds of desktops, laptops, and peripherals using Ivanti and Acronis imaging — standardizing builds and cutting rollout time significantly.
- **Identity & Access Control**, I am highly proficient in managing user lifecycles, account creation, and security permissions within Active Directory, Entra ID (Azure AD), and Okta.
- **Infrastructure Support**, Served as a Junior Administrator for Cisco and Meraki network infrastructure at JH Kelly, managing SD-WAN deployments, VoIP administration, and multi-site connectivity to keep branch offices running smoothly.

I also appreciate that Western Pacific runs a LEAN operation — where speed, consistency, and on-time delivery aren't buzzwords, they're the baseline. I know firsthand how much IT downtime can disrupt a business that depends on warehouse software, shipping logistics, and coordinated branch operations. For five years at JH Kelly, I kept IT infrastructure running across active construction and mechanical contracting sites. That same mindset — fix it fast, document it well, keep people productive — is exactly what I'd bring to your branches.

What really draws me to Western Pacific is the family-owned culture and the focus on doing things right. I'm looking to get back to a hands-on IT role where my work directly supports the people on the floor — the ones building, shipping, and delivering your products.

Thank you for your time. I would love the chance to talk through how my background in industrial IT support and desktop administration can help Western Pacific keep running at full speed.
